

MATHEMATICS OF THE USSR-SBORNIK

Volume 68, Number 1, 1991

A. A. Fomin, <i>Torsion-free abelian groups of rank 3</i>	1
N. G. Makarov, <i>On a class of exceptional sets in the theory of conformal mappings</i>	19
A. V. Faminskii, <i>The Cauchy problem for odd-order quasilinear equations</i>	31
V. G. Maz'ya and A. A. Solov'ev, <i>On an integral equation for the Dirichlet problem in a plane domain with cusps on the boundary</i>	61
Yu. N. Drozhzhinov and B. I. Zav'yalov, <i>Multidimensional Abelian and Tauberian comparison theorems</i>	85
I. I. Sharapudinov, <i>Asymptotic properties of orthogonal Hahn polynomials in a discrete variable</i>	111
V. M. Miklyukov and V. G. Tkachev, <i>Some properties of tubular minimal surfaces of arbitrary codimension</i>	133
Yu. I. Saponov, <i>Semiregular corner singularities of smooth functions</i>	151
V. P. Shunkov, <i>On Frobenius pairs of the form $(F \succ V, V)$</i>	165
D. V. Treshchëv, <i>The mechanism of destruction of resonance tori of Hamiltonian systems</i>	181
I. V. Abramov and E. A. Roganov, <i>Quasiconformal homotopies of elementary space mappings</i>	205
Nguyen Tkhi Tkh'eu Khoa [Nguyễn Thị Thiệu Hoa], <i>Some extremal problems on classes of functions determined by linear differential operators</i>	213
Fam Khyu T'ep [Pham Huu Tiep], <i>Irreducible orthogonal decompositions in Lie algebras</i>	257
M. V. Zakhar'yashchev, <i>Modal companions of superintuitionistic logics: syntax, semantics, and preservation theorems</i>	277
A. Yu. Kolesov, <i>Duck trajectories of relaxation systems connected with violation of the normal switching condition</i>	291

Volume 68, Number 2, 1991

V. V. Andrievskii, V. I. Belyi, and V. V. Maimeskul, <i>Approximation of solutions of the equation $\partial^j f = 0$, $j \geq 1$, in domains with quasiconformal boundary</i>	303
G. G. Gevorkyan, <i>On the uniqueness of trigonometric series</i>	325

I. A. Kuzin , <i>Solvability of some elliptic problems with critical exponent of non-linearity</i>	339
A. V. Pazhitnov , <i>On the sharpness of Novikov type inequalities for manifolds with free abelian fundamental group</i>	351
B. S. Rubin , <i>Multiplier operators connected with the Cauchy problem for the wave equation. Difference regularization</i>	391
V. A. Ufnarovskii , <i>On the use of graphs for computing a basis, growth and Hilbert series of associative algebras</i>	417
Yu. B. Rudyak , <i>Orientability of bundles: obstruction theory and applications to K-theory</i>	429
B. A. Zalesskii, V. V. Sazonov, and V. V. Ul'yanov , <i>A precise estimate of the rate of convergence in the central limit theorem in Hilbert space</i>	453
A. N. Starkov , <i>Ergodic decomposition of flows on homogeneous spaces of finite volume</i>	483
G. V. Sandrakov , <i>Averaging principles for equations with rapidly oscillating coefficients</i>	503
A. Ya. Khelemskii , <i>The homological essence of Connes amenability: injectivity of the predual bimodule</i>	555
M. V. Sapir , <i>A minimal variety of associative algebras with unsolvable word problem</i>	567
G. M. Vainikko , <i>On the smoothness of the solution of multidimensional weakly singular integral equations</i>	585
